

- I am a student learning Artificial Intelligence and Data Science engineering and pursuing second year now.

- Right now being a learner and a beginner in data science field, I am exploring the field and finding it very interesting and enjoyable to learn.

- Basically, I found myself as a curious person looking forward to solve the problems.

- I prefer figures and numbers over long sentences and paragraphs.

- I am always curious and wondering 'why' when solving any real life problems.

- I believe that above mentioned are the key elements for me to learn data science and my growing interest in this stream.

- I define a data scientist as someone who finds solutions to problems by analyzing Big or small data using appropriate tools and then tells stories to communicate her findings to the relevant stakeholders.
